All-points alert to my friends

(612) 455-1227 (Just I'm a call away)

Everyone in the U.S. seems to have become deeply depressed, almost overnight! This is not your individual fault! Don't keep this to yourself - tell others, and you'll be surprised to find that they too are depressed, but they've been too ashamed to tell you! Let's start sharing our grief right now.

DO NOT DRINK TO TREAT THIS! Get an Rx from your M.D. or psychiatrist for anti-depressent medicine, but do not self-treat yourself with alcohol or cocaine or what ever. Believe it or not, The "Establishment" does want you to take to alcohol, because you then "won't cause any trouble." Reject this cruel message and start raising hell about the real cause of our depressin: Bush's busting the economy and his plan to attack Iraq

(Free) if you need help! I will give treatment. Talk to me M.D. not
